

## 1. Installation

- extract package to your main WHMCS directory

## 2. Configuration

### 2.1 Server

- go to Setup → Product/Services → Servers
- create server group
- add new server to the group

<b>Module</b> <small>Choose the control panel the server uses</small>	<div>Hivelocity ▾</div>
<b>Hostname or IP Address</b> <small>Used to connect to your servers API</small>	<div>core.hivelocity.net</div>
<b>Username</b>	<div></div>
<b>Password</b>	<div></div>
<b>Access Hash</b>	<div><u>46f5b5396bd6f8455b47b488c8eae191356d6eed</u></div>

Continue »

- select Hivelocity from Module dropdown
- use core.hivelocity.net as Hostname and your API key as Access Hash
- save changes

## 2.2 Product

- go to Setup → Product/Services → Product/Services
- create new product
- go to Module Settings tab

The screenshot shows the 'Module Settings' tab selected in a navigation bar. The form contains the following fields:

Module Settings	
Module Name	Hivelocity
Server Group	Hivelocity Server Group
Product	580 - E-2236 3.4GHz Coffee Lake - 16GB - 480GB SSD (125 USD)
Billing Info	visa **** * 3768

A blue button labeled 'Generate Configurable Options' is located to the right of the Product field.

- select Your server group from the Server Group dropdown and Hivelocity from the Module dropdown
- select Hivelocity product and credit card
- save changes
- new fields will appear

This screenshot shows the same 'Module Settings' tab, but with additional fields that have appeared after clicking the 'Generate Configurable Options' button. The form now includes:

Module Settings	
Module Name	Hivelocity
Server Group	Hivelocity Server Group
Product	580 - E-2236 3.4GHz Coffee Lake - 16GB -
Billing Info	visa **** * 3768
Operating System	CentOS 7.x
Location	Amsterdam, Netherlands (10 USD)
Panel	No Panel

The 'Generate Configurable Options' button remains visible next to the Product field.

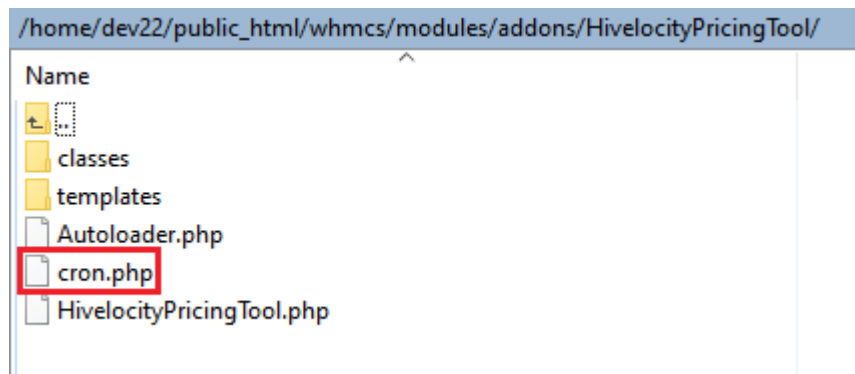

- configure product location, operating system and panel, these settings will be used if no Configurable Options are created
- save changes
- if you want to create Configurable Options press Generate Configurable Options button

## 2.3 Pricing Tool addon

- go to Setup → Addon Modules
- activate Hivelocity Pricing Tool module

Module	Version	Author			
» Hivelocity Pricing Tool A simple interface allowing you to quickly change pricing for all the products using Hivelocity as the provisioning module.	1.0.0	ModulesGarden	Activate	Deactivate	Configure
Price Change Notification <input checked="" type="checkbox"/> Check if you want to receive an email notification about the price change of Hivelocity products.					
Access Control Choose the admin role groups to permit access to this module: <input checked="" type="checkbox"/> Full Administrator <input type="checkbox"/> Sales Operator <input type="checkbox"/> Support Operator					

- check Full Administrator checkbox
- save changes
- add modules\addons\HivelocityPricingTool\cron.php to your cron job table

- Pricing Tool is available at Addons → Hivelocity Pricing Tool

### Hivelocity Pricing Tool

Currency:  Profit:  %
